**About OctoPlus**

OctoPlus N.V. is a product-oriented biopharmaceutical company committed to the creation of improved pharmaceutical products that are based on OctoPlus' proprietary drug delivery technologies and have fewer side effects, improved patient convenience and a better efficacy/safety balance than existing therapies. Rather than seeking to discover novel drug candidates through early stage research activities, OctoPlus focuses on the development of long-acting, controlled release versions of known protein therapeutics, other drugs, and vaccines on behalf of its clients.

Our pipeline consists of 4 products in pre-clinical and clinical development. The lead product incorporating our technology is Locteron, a controlled release formulation of interferon alfa for the treatment of chronic hepatitis C, which has been licensed to Biolex Therapeutics and is being manufactured by OctoPlus. Locteron is currently in Phase II clinical studies. Furthermore, our pipeline comprises a product candidate for the treatment of chronic middle ear infection which has completed Phase II clinical proof of concept, and two pre-clinical-stage single-shot vaccines.

In addition, OctoPlus is a European leading provider of advanced drug formulation and clinical scale manufacturing services to the pharmaceutical and biotechnology industries, with a focus on difficult-to-formulate active pharmaceutical ingredients.

OctoPlus is listed on Euronext Amsterdam by NYSE Euronext under the symbol OCTO. For more information about OctoPlus, please visit our website [www.octoplus.nl](http://www.octoplus.nl).
